PROFILE

MSc Data Science student at Lingnan University, Hong Kong, with hands-on experience in deep learning model development, computer vision, and large language model deployment. Proficient in Python and PyTorch, with a track record of independently building and fine-tuning end-to-end ML pipelines. Seeking algorithm engineer or AI engineer roles in Shenzhen or Hong Kong.

EDUCATION

Lingnan University, Hong Kong 2025 – 2026

MSc Data Science

- Coursework: Machine Learning, Deep Learning, Computer Vision, Data Mining, AI Principles

Guangzhou Maritime University 2021 – 2025

BSc Economics & Management

SKILLS

- Programming: Python (proficient)
- Deep Learning: PyTorch, YOLOv8 / YOLO11, ResNet, SE-Attention, CNN, TensorFlow / Keras
- LLM: Fine-tuning & deployment — LLaMA-7B / Lion-7B (knowledge distillation)
- Data Mining: Apriori association rules, decision tree classification, collaborative filtering
- Libraries & Tools: scikit-learn, NumPy, Matplotlib, Gradio, Jupyter, Git / GitHub
- Languages: Mandarin (native), Cantonese (fluent), English (IELTS 6.0)

PROJECTS

Real-Time Smart Parking Detection — Dual-Model YOLO System Mar – Apr 2026

Group Project · System Testing & Evaluation

- Integrated YOLOv8n (396 predefined ROIs for known viewpoints) and YOLO11n (general-purpose) in a dual-model framework with automatic scene-based model switching.
- Achieved 94% accuracy, 92% precision, 93% recall — 22% above traditional CV. Real-time 42 FPS at 24ms latency on Full HD video; >70% accuracy under adverse weather.

CIFAR-100 Image Classification — ResNet-18 with SE-Attention Mar – Apr 2026

Group Project · Visualisation & Report

- ImageNet-pretrained ResNet-18 augmented with SE attention block in PyTorch 2.0; three ablation experiments across loss functions, LR schedules, and batch sizes.
- My contribution: produced all evaluation charts (ROC, loss/LR/batch comparisons) and co-authored the final report. Result: ~72% top-1 accuracy, AUC 0.99.

Financial LLM Knowledge Distillation — LION-Fin Framework Jan 2026 – Present

Group Project · Model Design & Training

- Proposed LION-Fin to distill GPT-4 financial domain expertise into LLaMA-7B; managed training pipeline, environment setup, and hyperparameter optimisation.

MovieRec — Collaborative Filtering with Z-Score Optimisation Feb – Mar 2026

Group Project · Evaluation & Visualisation

- Built UBCF and IBCF on MovieLens (6,040 users, 3,706 movies, 99.51% sparse). Z-Score normalisation corrected rating bias across both methods.
- My contribution (Part 3/5): performance benchmarking and visualisation. Item-Based CF achieved 59% lower MAE (0.4410 vs 1.0786) and broader genre diversity.

Dogs vs Cats Image Classification — CNN with Interactive Demo Feb – Mar 2026

Group Project · Performance Evaluation & Error Analysis

- CNN trained with TensorFlow/Keras on 25,000 images (150×150 px) with augmentation (rotation, flip, zoom, shear). Achieved 89% validation accuracy on 5,000 held-out images.
- My contribution (Member D): confusion matrix, per-class accuracy analysis, and error case review identifying key failure modes in ambiguous or low-quality images.

Cooling System Data Analysis — Association Rules & Classification Oct – Nov 2025

Group Project · Data Mining & Business Insight

- Applied Apriori association rule mining on cooling sensor data; extracted 10 high-value rules (confidence ≥93%, lift ≥2.7) covering temperature control, high-load, and energy-saving scenarios.

- Identified optimal operating range (22.73–25.24°C) and load thresholds. Decision tree (accuracy 21–25%) deemed unusable, steering team to rule-based recommendations instead.

INTERNSHIP EXPERIENCE

Big Data Analytics Intern • Qiye (Foshan) Software Co., Ltd.Jul – Sep 2023

- Assisted with data processing and basic analysis tasks; gained familiarity with enterprise data workflows.

New Media Operations Intern • Foshan Yixin Network TechnologyJul – Sep 2024

- Supported content planning and short-form video production; participated in daily account operations.

Freight Operations Intern • Shenzhen Jiuan Accounting FirmJan – Mar 2024

- Assisted with basic booking coordination and shipment tracking; familiarised with international logistics procedures.

Audit Assistant Intern • Foshan Zhongtianhua CPA Co., Ltd.Aug – Sep 2022

- Organised financial records and supported senior auditors in understanding the fundamentals of the audit process.
